

Claudio Caccia

R&D Engineer at Atos S.p.A.

Claudio Caccia, via Gramsci 4, Busto A., Italy

HR Dept. — Orion
Hurksestraat 43
5652 AH Eindhoven, Netherlands

July 24, 2018

Dear Mr. de Boever,

I wish to apply for the position of *Technologist - FEM* as advertised on Orion website.

I have strong experience in developing FEM models and supporting engineers in creating new products and optimizing performances: this is what I do in my current company. I have a great passion in building models that help understanding the physics underlying the behavior of products and components. I like multidisciplinary environments and my background allows me to deal with topics that extend from mechanics to computer science. Learning new things and solving difficult problems are for me the most important aspects of a job.

I believe that my skills and experience would make me a valuable asset for the company. I am excited about the opportunity of joining Orion and look forward to meeting you to discuss the position further. Thank you for taking the time to consider my credentials.

Sincerely yours,

Claudio Caccia
