Engineer at Atos S.p.A.

Claudio Caccia, via Gramsci 4, Busto A., Italy

HR Dept. — Orion
Hurksestraat 43
5652 AH Eindhoven, Netherlands

July 24, 2018

Cover Letter

Dear Ms. Samjhawan,

I wish to apply for the position of *Embedded Software Developer – Eindhoven – Noord-Brabant* as advertised on Orion website.

The job description perfectly says what I like: write applications that make things move. I have a strong experience in writing software for embedded systems, as I developed the firmware that controls flow and pressure of all the hydraulic components produced by my current company. I like multidisciplinary environments and my background allows me to deal with problems that extend from mechanics to computer science. I also have a predilection for the Linux operating system.

I believe that my skills and experience would make me a valuable asset for the company. I am excited about the opportunity of joining Orion and look forward to meeting you to discuss the position further. Thank you for taking the time to consider my credentials.

Sincerely yours,

Claudio Caccia
